1 Introduction

1.1 Purpose

These test cases confirm that Inventory Analyzer v1.2 works on your own PCs, in your own browsers and on your own folders before it is used for real work. They cover every screen, both ways of choosing a folder, every status, the reports, scan history, privacy and the shared link.

1.2 How to use this document

1. Set up the test environment in section 1.3.
2. Run the cases in order. Later cases reuse scans made earlier.
3. Write P (pass) or F (fail) in the last column. For a fail, note the scan ID and what you saw in section 15 (Defect log).
4. Sign off in section 16 when all mandatory cases pass.

1.3 Test environment

Item	Value
PC	A standard Windows 10 or 11 user PC, without administrator rights
App	`Start Inventory Analyzer.bat` and `Inventory Analyzer.html` v1.2 in one folder; the shared link, if your team will use it
Browsers	Microsoft Edge and Google Chrome (all cases); Firefox or Safari (cases marked "upload")
Sample data	Built in: New Scan > **Try with sample data**
Test folder	A copy of a real team folder with at least 1,000 files and a few subfolders. Add: one empty folder; one folder containing only an empty subfolder; two identical files with different names; one file named `=1+1.txt`; one file with accents in its name, such as `Résumé — Ünïcødé.docx`; one folder named `.hidden-test` with one file in it
Locked file	Any Office document in the test folder, open in Word or Excel during case UAT-24
Reference counts	Right-click the test folder in Windows Explorer > **Properties**: note the number of files and folders and the **Size**

> **Expected sample counts**
>
> The sample folder always gives: 318 files, 27 folders, 1.03 GB (1,111,158,476 bytes), status Complete with errors, 1 error (`Shared Drive/Finance/Audit (restricted)`, permission-denied), 7 empty folders, 3 files at or above 100 MB, 21 file types. Without dot-prefixed items: 305 files, 26 folders, 2 skipped. With duplicate detection: 2 groups, 4 files, 475 KB redundant.

1.4 Priority

Priority	Meaning
M	Mandatory for go-live

Priority	Meaning
H	High: fix before wide roll-out
L	Low: can be accepted with a workaround

2 Starting the app

ID	Pri	Test	Steps	Expected result	P/F
UAT-01	M	Launcher opens the app	Double-click `Start Inventory Analyzer.bat`	The app opens in its own Edge window on **New Scan**; no install, no admin prompt	
UAT-02	H	Launcher without the HTML file	Copy only the .bat file to another folder and run it	Message says it could not find `Inventory Analyzer.html` and to keep both files together	
UAT-03	M	HTML file directly	Open `Inventory Analyzer.html` in Chrome	The same app opens; **Choose folder...** is enabled	
UAT-04	M	Menu before a scan	Look at the menu	Dashboard to Scan Errors are greyed out; New Scan, Scan History, Settings and Help & Documents work	
UAT-05	H	Capability check	Expand **Browser capability check** in Edge	All six items show Available	

3 Sample data

ID	Pri	Test	Steps	Expected result	P/F
UAT-06	M	Sample scan	**Try with sample data**	Dashboard with **Sample data** label; counts as in the note in section 1.3	
UAT-07	M	Where your files are	Read the table	Engineering 139, Photos 70, Finance 55, Marketing 30, HR 22, files directly in Shared Drive 2, Empty project 0	
UAT-08	M	Sample not recorded	Open **Scan History**	No sample run is listed	

4 Choosing a folder and scanning

ID	Pri	Test	Steps	Expected result	P/F
UAT-09	M	Choose folder	New Scan > **Choose folder...** > pick the test folder > **View files**	Scan runs and the dashboard opens with access mode **Folder picker**	
UAT-10	M	Counts match Windows	Compare files, folders and size with the Windows Properties reference	Files and folders match (folders on the dashboard include the selected folder itself, so expect one more than Windows shows). Size matches Explorer's **Size**, not "Size on disk"	

ID	Pri	Test	Steps	Expected result	P/F
UAT-11	M	Read-only	Before and after the scan, compare the test folder's file count, names and modified dates	Nothing changed	
UAT-12	H	Cancel the picker	**Choose folder...**, then close the picker	Nothing happens; no error	
UAT-13	M	Progress	Scan a large folder (10,000+ files)	Phase, moving bar, counters, current path and elapsed time update; no fake percentage	
UAT-14	M	Cancel a scan	During UAT-13, click **Cancel scan**	Results so far are shown, labelled **Cancelled — partial** on the dashboard, in the history and in the Excel summary	
UAT-15	M	Upload a folder (upload)	In Firefox or Safari: **Upload a folder...** > pick the test folder > confirm	Scan completes; access mode **Folder upload**; nothing is sent over the network	
UAT-16	H	Upload hides empty folders (upload)	After UAT-15 open **Empty Folders**	Warning that upload mode cannot see empty folders	
UAT-17	M	Exclude dot-prefixed items	Untick **Include dot-prefixed items**, scan the test folder	`.hidden-test` and its file are not listed; the dashboard counts them as skipped	
UAT-18	H	Options remembered	Change Top-N to 10, close and reopen the app	Top-N is still 10; duplicate detection is off	

5 Dashboard

ID	Pri	Test	Steps	Expected result	P/F
UAT-19	M	Totals	Scan the test folder; read the totals	Files, folders, size, average, largest file and subfolder with paths, duration and status are shown	
UAT-20	M	Where your files are	Click the first folder in **Where your files are**	Folder Explorer opens with that folder highlighted and expanded	
UAT-21	H	Key findings and charts	Read key findings; hover over a chart bar	Sensible findings; the bar shows its value	

6 Folder Explorer

ID	Pri	Test	Steps	Expected result	P/F
UAT-22	M	Counts per folder	Open a folder you know; compare **files here** and **in total** with Windows Explorer	Both counts correct	
UAT-23	M	Find a file	Type part of a known file name	Only matches and their folders show, opened, with a match count	

ID	Pri	Test	Steps	Expected result	P/F
UAT-24	H	Locked file	Rescan while an Office document in the folder is open	The file is listed; any read problem appears in Scan Errors as not-readable or metadata error, with a hint	
UAT-25	M	Empty folders in the tree	Find the empty test folders	Shown as **empty** and **no files (only empty subfolders)**	

7 File Inventory and Folder Summary

ID	Pri	Test	Steps	Expected result	P/F
UAT-26	M	Search and filters	Search a name; filter by extension, size and date; **Reset**	Count updates with each filter; Reset shows all files	
UAT-27	M	Show in folder tree	Click 📍 on any file	Folder Explorer opens with the file selected inside its folder	
UAT-28	M	Unicode name	Search `Résumé`	The file shows with its exact name	
UAT-29	M	Direct vs recursive	In Folder Summary find a folder with subfolders	Recursive files and size ≥ direct; values match Windows Explorer	
UAT-30	H	Open a folder's files	Click a folder name in Folder Summary	File Inventory shows **In folder** with that path, and only files in that folder and below (not in a folder whose name merely starts the same)	
UAT-31	H	Paging and sorting	Change rows per page to 100; sort by Size, then by Modified	Pages and sorting work	

8 Storage Analysis

ID	Pri	Test	Steps	Expected result	P/F
UAT-32	M	Top N	Change **Top N** to 5	Lists show 5 items; headings say "Top 5"	
UAT-33	M	Large-file threshold	Change **Large-file threshold (MB)** to 1	**Large files (≥ 1 MB)** lists every file of 1 MB or more	
UAT-34	H	Extension summary	Read the table	Percentages add up to about 100%; counts match File Inventory per extension	

9 Duplicate Files

ID	Pri	Test	Steps	Expected result	P/F
UAT-35	M	Off by default	Open **Duplicate Files** after a normal scan	Says detection was off; **Set up a scan with duplicate detection** returns to New Scan with it ticked	

ID	Pri	Test	Steps	Expected result	P/F
UAT-36	M	Duplicates found	Scan the test folder with duplicate detection on	The two identical files form one group; redundant size equals one file's size	
UAT-37	M	Same name is not a duplicate	Add two different files with the same name in two folders; scan with detection on	They are not grouped	
UAT-38	H	Never deletes	After UAT-36 check the folder	Both copies are still there	

10 Empty Folders and Scan Errors

ID	Pri	Test	Steps	Expected result	P/F
UAT-39	M	Empty folders	Open **Empty Folders** after UAT-09	Both empty test folders are listed with the right classification	
UAT-40	M	Denied folder	Scan a folder containing a subfolder you have no access to (or use the sample data)	Dashboard warning; Scan Errors lists it as permission-denied with a hint; the folder is unknown, never empty; its parents are incomplete	

11 Reports

ID	Pri	Test	Steps	Expected result	P/F
UAT-41	M	Excel	Click **Excel (.xlsx)**; open the file	Message confirms sheets and rows matched; Executive Summary, Folder Tree, File Inventory, Folder Summary, Extension Summary, Largest Files, Largest Folders, Empty Folders and Scan Errors sheets present	
UAT-42	M	Excel row counts	Compare the File Inventory sheet's rows with the dashboard's file count	Equal	
UAT-43	M	Folder Tree sheet	Read the Folder Tree sheet	Indented by level, folders bold, files under their folders, files here and in total per folder	
UAT-44	M	CSV ZIP	Click **All CSVs (.zip)**; open each CSV in Excel	One CSV per report; accented names correct	
UAT-45	M	Formula injection	Find `=1+1.txt` in the CSV and the Excel file	Shown as text, never calculated as 2	
UAT-46	H	Single CSV	**Single CSV...** > Scan Errors	One CSV with the stated number of rows	
UAT-47	H	Duplicate sheet	Export after UAT-36	Duplicate Files sheet and CSV present, with group and SHA-256	

12 Scan History

ID	Pri	Test	Steps	Expected result	P/F
UAT-48	M	Recorded	Open **Scan History** after UAT-09 and UAT-14	Both scans listed with ID, times, status, counts and size; the open one says **open now**	
UAT-49	M	Reopen after closing	Close the app window; open it again	New Scan offers **Open last scan**; it opens the scan labelled **Saved scan** with every screen working	
UAT-50	M	Download from history	In Scan History click **Excel** and **CSVs** for an older scan	Both download for that scan without changing the open one	
UAT-51	M	Delete	**Delete** one scan	It disappears; the others remain	
UAT-52	H	Summary only	Settings > untick **Keep full results of past scans on this PC**; scan a folder	The new scan shows **Summary only**; Open, Excel and CSVs are greyed out	
UAT-53	H	Clear all	**Clear all history**	The list is empty	

13 Settings, privacy and Help

ID	Pri	Test	Steps	Expected result	P/F
UAT-54	M	No network	Press F12 > **Network**, clear it; scan the test folder and download Excel	No request is made to any other site	
UAT-55	H	Restore defaults	Change options; click **Restore defaults**	Options return to: dot-items on, duplicates off, 100 MB, 25, 1,024 MB	
UAT-56	M	Guides in the app	Open **Help & Documents**; open each tab	All seven guides readable with screenshots	
UAT-57	H	Guide PDF	Click **PDF** on the User Guide	A formatted PDF with cover, contents and page numbers downloads	
UAT-58	L	Phone width	Open the shared link on a phone; run the sample data	Every screen fits the width without sideways scrolling	
UAT-59	H	Keyboard only	Using only Tab, Enter and the arrow keys, run the sample data and open File Inventory	Everything can be reached and used	

14 Shared link

ID	Pri	Test	Steps	Expected result	P/F
UAT-60	M	Link is shared	Open the link in a private window, not signed in	The app opens (not "Sign in to view this page")	
UAT-61	M	Scan on the link	**Choose folder...**; if blocked, **Upload a folder...**	Either the picker works, or a message explains it is blocked and upload works	

ID	Pri	Test	Steps	Expected result	P/F
UAT-62	M	Download on the link	Click **Excel (.xlsx)**; confirm the save prompt	The workbook downloads; declining says "Save cancelled — no file was saved"
